

LATIKA

113/5A, B.N.C, Pipli, Kurukshetra-136131
Ph-+91-9991744163; Email: latikagandhi97@gmail.com

Objective

Keen to have a challenging and performance oriented career with an organization and utilize my potential and skills to achieve professional growth and add valuable asset to organization

Education

- **B.Sci.(Computer Science)** from Kurukshetra University Kurukshetra.
- **XII from Pooja Modern Public School, Kurukshetra, Haryana. (C.B.S.E.)**
- **X from Holy Child School, Kurukshetra, Haryana. (C.B.S.E.)**

Work Experiences

Total experience of 1Years (including 3 months of Internship) in IT sector as ReactJs, Html, CSS, Bootstrap (Frontend) developer.

Projects

- **Nomoogle**
Description Nomoogle allows users to reduce the influence of Google in their lives.Popup reminders when you try to access a Google product. Easily find alternatives to Google products with just one click. Two special modes: Redirect Mode and Strict Mode.This is the top second product of the day on product Hunt.
Responsibility: I made a landing page for this product. By using HTML5, CSS3, and grid.
github link: <https://teamxenox.github.io/nomoogle-landing/?ref=producthunt> .
- **Brogrammers**
Description Brogrammer, which is a simple JavaScript project used to challenge the programmers/coders for the exercise during their working hours. This is the top 5 products of the day, on Product Hunt (developer's site for open sources).
github link: <https://sarthology.github.io/brogrammers/?ref=producthunt> .
- **Patterns Job**
Description As, so many people organize the small parties or events in their home, so they have to search for the workers who can manage all the party or event. So, instead, just book the number of workers here from this web- app as according to their needs, specify the timings of their shifts and hourly wages and they easily got the workers as many as they want.
Responsibility: As I convert all the psd file design into React design the whole Frontend designing was done by me.
Project Link : <https://app.patternjobs.com> .
- **Burpy**
Description: It is the mobile food-app, from which user can place their order easily. It will detect the user location and on the basis of that, will show every restaurant in nearby location.
Responsibility: Firstly, I created all the app mockups and then convert that design into Html, CSS. All the frontend designing part was done by me.

- **Librakit**

Description It is web app, from which user can make their record easily.

Responsibility: I created and setup the project base and the whole Front- end developing was done by me in Reactjs, using atomic design as well as story book.

- **Bharat Computer World**

Description It is the web application, for computer center, which that center owner can make their students record as well as student can verify them as they are the part of that center or not.

Responsibility: Client provide design template that I convert into html using bootstrap. Frontend is in angular6.
